PROFILE

iOS Developer with years of experience delivering fast, stable, and user-friendly mobile apps across Fintech, Utility, and Trading domains. Skilled in Swift, UIKit, Combine, and MVVM/MVVM-R with hands-on experience improving legacy codebases, modernizing architecture, and implementing high-impact features. Strong at UI updates, payment flows, API integrations, and converting complex designs into clean, scalable components.

WORK EXPERIENCE

iOS Developer, *barq Pk* 📄

2025 Jan – Present

Lahore, Pakistan

- Developed major consumer and merchant features including **Topups, Utility Bills, Bus Ticketing**, and Wallet flows.
- Improved app stability by **reducing crash rate by 35%** and load times by **40%** through code refactoring.
- Migrated core modules to **Combine + MVVM-R**, improving responsiveness and reducing UI bugs.
- Performed complete **UI/UX rebranding**, converting Figma designs into reusable UIKit components.
- Integrated high-volume **REST APIs** for secure transactions and smoother payment flows.
- Implemented **Deep Linking** across referral and navigation flows.

iOS Developer, *Xint Solutions | MyTm*

2023 Apr – 2025 Jan

Lahore, Pakistan

- Updated and improved existing **UI screens** to enhance usability and visual consistency.
- Migrated legacy code from **protocol-delegate patterns** to modern MVVM-based architecture.
- Implemented new features including **Mobile Bundles, Internet Packages**, and **Bus Booking flows**.
- Optimized code structure, removed redundancies, and improved API handling for better performance.
- Collaborated with backend teams to ensure accurate data flow across bundle and ticketing features.

iOS Developer., *Coder Crew* 📄

2021 May – 2023 Mar

Lahore, Pakistan

- Built and maintained iOS apps using UIKit, TableView, and REST APIs.
- Integrated Stripe and Rapyd payment gateways for seamless in-app purchases.
- Implemented advanced features using ARKit, MapKit, and WalletConnect.
- Used Realm for local data storage, improving performance for offline users.
- Contributed to architecture using MVVM pattern, improving code readability and testing

iOS Developer(Internship), *Coder Crew*

2021 Feb – 2021 Apr

Lahore, Pakistan

- Gained hands-on experience in Xcode and Swift by assisting with live iOS app development.
- Contributed to building UI screens and debugging under senior developer guidance.
- Learned to use Alamofire and other third-party libraries for API integration.

SKILLS

Programming Language — Swift, SwiftUI

iOS Frameworks — UIKit, Combine, Core Data, MapKit, ARKit, AVPlayer

Tools — Xcode, Git/GitHub, Figma, Intercom

Architecture & Design — MVVM, MVVM-R, Clean Architecture, Singleton Pattern

Networking & Storage — RESTful APIs, JSON, Alamofire, Kingfisher, Realm Database, Firebase (Auth, Firestore)

Integrations — Stripe, Rapyd, WalletConnect, Google/Facebook/Apple Sign-In

PROJECTS

barq PK, Swift, Xcode

2025 Jan – Present

- Modernized architecture using **Combine + MVVM-R** for smoother UI updates.
- Updated UI during full app rebranding using reusable UIKit components.
- Implemented key features: **FT, IBFT, Topups, Utility Bills, Bus Ticketing**, merchant flows.
- Optimized API handling for faster and more reliable payments.

MyTM Consumer (Xint Solutions), Swift,Xcode

2024 Jul – 2025

- Updated and refreshed UI screens to match new design guidelines.
- Migrated old modules from **protocol-delegate** to MVVM, improving code clarity.
- Implemented features like **Mobile Bundles, Internet/Data Packages**, and **Bus Booking**.
- Enhanced performance by cleaning up legacy code and improving API response handling.

Degn – Crypto Trading App (Personal), Swift, Xcode

2024 Oct – 2025 Mar

- Designed and implemented a **complex UI**, ensuring an intuitive trading experience.
- Added features like **real-time price graphs** and **haptic feedback** for enhanced user interaction.
- Developed seamless **buy/sell trading functionality** for meme coins.
- Integrated **Intercom** for real-time **user support and engagement**.
- Optimized blockchain interactions for **faster and cost-efficient transactions**.
- Implemented deep linking to allow easy navigation and sharing of specific tokens.

Reizor (Coder Crew), Swift,Xcode

2022 Apr – 2023 Jan

Libraries Used: Alamofire, Kingfisher, Firebase, Realm, AVPlayer, WalletConnect

- Designed and optimized user interfaces using MVVM, improving app usability and performance.
- Integrated RESTful APIs and Realm for smooth data flow and offline persistence.
- Built advanced features using ARKit and MapKit to enhance user interaction.
- Developed systems for event ticketing and token-based transactions.
- Integrated Stripe, Rapyd, and Bitpay to support secure, real-time crypto and fiat payments.

SpotHunter (Coder Crew), Swift,Xcode [↗](#)

2022 Mar – 2022 Sep

- Worked on fixing bugs.
- Updated the user interface to improve user experience.
- Added Delete functionality and implemented API for user deactivate using RESTful API.
- Worked on Mapkit for sharing spots.
- Implemented Facebook, Google and Apple SDK to login in the app.

Additional Projects

- **Hotline** – Built UI and integrated Firebase authentication and swipe image features using Kaloda View.
- **Family Picture Will** – Created UI and integrated future messaging features and deactivation API.
- **YomiTech Consumer** – Built UI aligned with Figma, added KYC verification and child wallet features.
- **MyTM Dukaan** – Revamped with MVVM-R, integrated Ufone bundles and ticket booking.

EDUCATION

Bachelor | 2024, *Virtual University of Pakistan, Lahore*
